

# HIRUSHA DINIL RUBASINGHE

📍 Colombo, Sri Lanka    ✉️ [dinilr28@outlook.com](mailto:dinilr28@outlook.com)    ☎️ +94 743228881    🌐 [in/hirusha-dinil-rubasinghe-66bbba313](https://in/hirusha-dinil-rubasinghe-66bbba313)    🌐 [dinilr.com](https://dinilr.com)

## SUMMARY

Full-stack software engineer with production experience building and shipping cloud-native systems across international teams. Designed and deployed serverless microservices on AWS Lambda, engineered multi-tenant data pipelines, and resolved live production incidents — all within a real SaaS environment at a UK company. Proficient across the modern TypeScript ecosystem: React, Next.js, Node.js, and AWS. Driven by the intersection of performance, reliability, and user-facing impact.

## TECHNICAL SKILLS

|                |                                                                                                                       |
|----------------|-----------------------------------------------------------------------------------------------------------------------|
| Frontend       | React, Next.js, Astro, TypeScript, Tailwind CSS, TanStack Query, Recharts, Framer Motion                              |
| Backend        | Node.js (Fastify), NestJS, Python (FastAPI/Django), RESTful APIs, OAuth, Firebase, CI/CD, Unit Testing, Microservices |
| Cloud & DevOps | AWS (Lambda, RDS, S3, CDK, Cloudfront, EventBridge, SQS), Docker, GitHub Actions, Google Cloud, Linux VPS             |
| Others         | PostgreSQL, Drizzle ORM, Prisma, C, Java, Git, Linux, Figma, Agile/Scrum Methodologies, GitHub                        |

## EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                                     |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------|
